SKILLS

- Extensive knowledge of Java, Python, JavaScript, and C programming.
- Mobile application development experience, mostly in Android.
- Teamwork and working on projects using VCSs (GitHub and Bitbucket).
- Knowledge of multithreading processes and asynchronous programming.
- API handling. E.g., location services, Google's Civic Information API, and an API that pulls from Wiktionary.
- DB handling in SQL, SQLite, MongoDB, JSON (often with serialization).

EXPERIENCE

COMPUTER SCIENCE TA – APRIL 2020 – DECEMBER 2021

ILLINOIS INSTITUTE OF TECHNOLOGY

Teaching and grading of student assignments related to object-oriented programming, algorithms, and data structures, primarily in Java.

Hosting office hours for students in need of help and running computer science laboratories for multiple classes.

MANAGER - NOVEMBER 2018 – FEBRUARY 2019

WRIGLEY HOSTEL

Maintenance and management of a hostel with a guest capacity of 100. Handled reservations through hosting management software. Routinely checked in guests, planned events, and cleaned the hostel daily. Additionally maintained basic structural upkeep, cooked breakfast for guests, and handled logistics for replenishable items.
